

Break Out Box

STS-SJB / STS-SJB-RJ

Our Break Out Box is used in addition or as a replacement to the staff unit. The box silences loudspeaker noise and allows staff to hear clearly through headsets. This product is a must have for busy ticket booths or service-points where ambient noise conditions are high.

A version with an RJ11 socket is available. This is for connection to the Sennheiser SC 230 and SC 260 headsets, using the Sennheiser CSTD 08 connection cable for easy setup.

Features

- Push button mute switch
- Headset and handset connection
- Compact
- Easy to install
- Version with RJ11 connection available

Applications

For use where one to one communication takes place at a counter, booth or desk in combination with a Contacta speech transfer system:

- Banks
- Post Offices
- Ticket Offices
- Information Centres
- Airports
