

JPL Companion

All-in-one - TEL/PC Switch, Amplifier,
Headset Training Adapter and Audio Playback Device*

More than just a Switch!

The JPL Companion is a flexible device that allows you to switch with dual connectivity to desk phone and computer. It has a multi-functional digital amplifier featuring an LCD display to show function and volume level, two headset ports that allow you to connect trainee and supervisor headsets as well as an instant recording button to record and playback conversations.

- Optimised for use with PC (Softphones) and desk phones
- Compatible with all brands of headsets
- Powered by USB port (no batteries)
- Simultaneous connection for up to 3 people (training purposes)
- DSP (Digital Signal Processing) technology
- Wideband audio delivers richer sound
- White noise reduction for clearer communications
- Automatic Level Control - protects from loud sound exposure
- Treble and bass bands equalizer allowing different audio characteristics
- Instant call recording via third party software allowing you to playback conversations or broadcast audio files*
- Mute and volume control
